

WITH OUR CUSTOM FLOOR GRAPHICS...

YOUR MESSAGE IS IN A WHOLE OTHER BALL GAME.

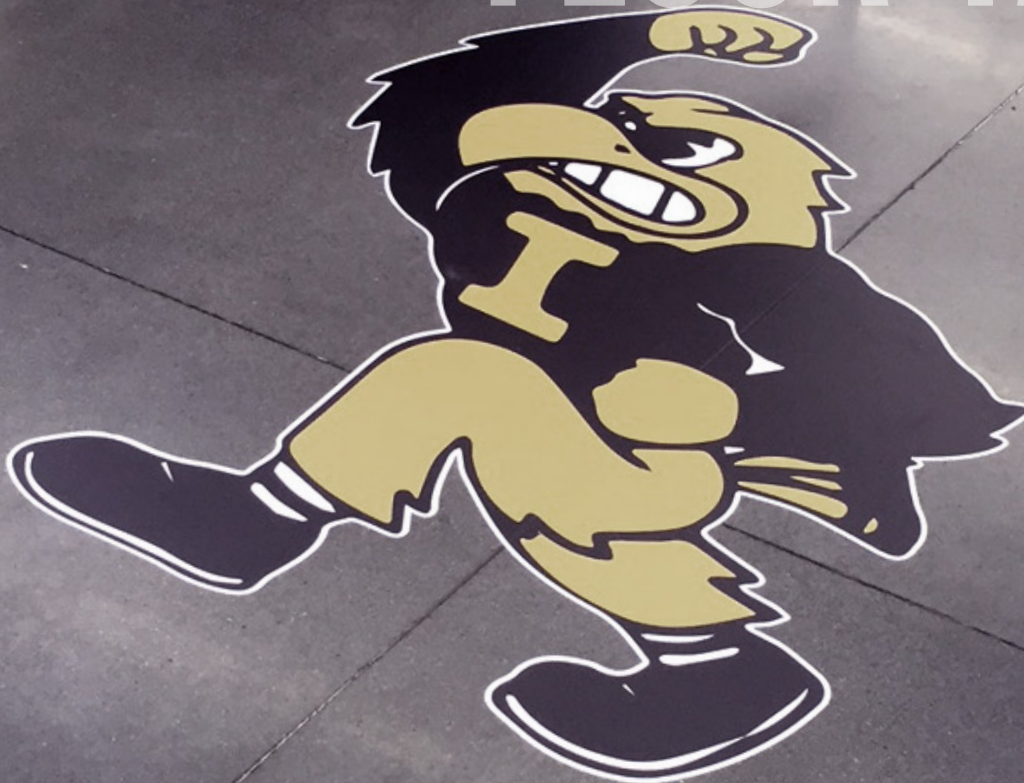

# ALUMIGRAPHICS®

Alumigraphics® are a fantastic outdoor option. The lightweight aluminum base material allows for a highly durable all weather use. These graphics are a peel and stick application with the thin aluminum counteracting to concrete and asphalt materials. Alumigraphics® come in two options: Grit and Smooth finish. Although they are both non slip certified the Grip will add extra traction for inclines or other areas you may wish to have a little extra traction. They are highly environmentally friendly with no PVC or harsh ingredients. When you are done just pull them up and use regular aluminum recycling to dispose of the signage.

# FLOOR TALKERS®

Our Floor Talkers® graphic systems hold up to heavy foot traffic for up to a year. With the available full color printing and contour cutting the options are limitless. Our design department can help you brand your event or we can help you create a brand new revenue option for your venue. They are UL-410 classified for slip resistance and easily removable when the application has served its purpose.

“The retail and advertising landscape is changing at a breakneck pace. Whether you have a brick and mortar selling retail items or you operate a venue selling ad-space for revenue, there is one constant, your customers and visitors are all looking down. Today we as a society are consuming information every waking moment. We don't even seem to stop when walking. Floor space is usually an under utilized marketing space, but through our experience it can be the most valuable. When something unique flashes before us under our phone we tend to stop and take notice.”
